

Visual Studio Code interface showing a C++ project named 'lab7' in the 'FS\_LAB' folder. The Explorer pane on the left lists files: file1.txt, file2.txt, merged.txt, output.txt, p.cpp, and p.exe. The main editor displays the code for p.cpp, which implements a Bubble Sort algorithm and file handling. The code is split into two panes, showing the same file (p.cpp) from different perspectives.

```
